Filtering Media

*The heart of the aquarium is the filter.
The right choice of filter materials is the basis for a good functioning of the aquarium.*

CRYSTALCIL MINI

Sintered glass cylinder media with an excellent porosity for mechanical and biological filtering of fresh and saltwater aquariums. CRYSTALCIL MINI has a dual function: mechanical filtering as it traps coarse impurities carried by the water (leaves, excess food, excrement), biological filtering thanks to its porous characteristic which offers a large surface area to help and promote bacteria development which then break down the organic substances.

Safe Water

CARBOZEO

Filtering medium blend made with 50% super-activated carbon (CLAROCAR) and 50% best selected zeolite (ZEOLITE) for fresh and marine water aquarium.

Activated carbon absorbs the polluting pigments produced by the decomposition of many substances in aquarium, such as food waste, dead algae and plants. Zeolite absorbs and neutralizes nitrites, nitrates, silicates and ammonia, keeping the aquarium water crystal clear.

Item code	Size	Weight	Carton	Barcode
CARBO		700 g	12 pcs	8 018189 100383

On the basis of very positive tests made at their own laboratories, PRODAC guarantee excellent results by using CARBO ZEO as filtering medium.

ZEOLITE

Filtering medium for biological and mechanical filtration for fresh and marine water aquarium. Zeolite material comes from vulcans and its molecular structure is very regular. Its absolutely high porosity absorbs ions and molecules of different composition and size, so that it neutralizes ammonium, silicates, nitrites and nitrates.

Item code	Size	Weight	Carton	Barcode
ZE700		700 g	12 pcs	8 018189 100369

ZEOLITE from PRODAC has an inside surface of 600 sq m/g, this guarantees the total absorption of polluting organic and inorganic substances.

NO NITRATES

A filtering media consisting of specific resins which adsorb nitrates found in freshwater aquariums and do not release the adsorbed substances in the water.

Item code	Size	Carton	Barcode
NON200	200 ml	12 pcs	8 018189 100314

Net Bag Included

CLAROSHELL

Natural filtering material consisting of small marine shells, suitable for use in a marine aquarium filter as it keeps the alkaline pH value stable, maintaining it at an optimal level for the health of the fish. A product highly effective for mechanical and biological filtering especially if it is used together with PRODAC FILTERWATTE and PRODAC CLAROCAR. It can be used in a calcium reactor to guarantee the necessary calcium supply to SPS and LPS corals due to their construction.

Water Treatment

Like in the oceans, rivers and lakes, even in the aquarium water is the element that determines the survival of every organism that lives in it.

In the breeding of any aquatic organism, the quality and chemical-physical characteristics of water are the most important.

AQUASANA

A water conditioner for fresh and salt water aquariums, necessary to neutralize the chlorine and chloramines from tap water, to reduce the heavy metal polluting effects of chemicals in the tap water and to prepare it for your fish.

It is enhanced with ALOE VERA, a special natural colloid which protects the surface and gills of fish. ALOE VERA has the ability to heal wound and promote regeneration of damaged fish tissue.

AQUASANA must be used immediately after filling your new aquarium and when water is partially replaced as it maintains the pH level stable and it is ideal and efficient to reduce fish stress.

DISCUS ELIXIR

Is a concentrate solution formulated for Discus and all other freshwater tropical fish. It contains iodine, magnesium and a complete vitamin B complex (B1, B2, B6) ideal for increasing vitality, stimulating appetite and reproduction and promoting the fish's natural colour. As aquarium water poor in iodine provokes thyroid problems and magnesium strengthens and reinforces the bone structure preventing stunted growth, it is therefore essential to maintain these minerals at a constant level in the aquarium. As DISCUS ELIXIR is a liquid it is easily absorbed and constant use of this product ensures these minerals and other elements vital for Discus and all other tropical fish are maintained in the water.

FERTIL PLANT

Is a natural soft, porous and gravel (2-6 mm) bottom soil consisting of clay, zeolite and soils rich in trace elements ideal for planted freshwater aquariums. FERTIL PLANT is a natural and nutritional product absorbed through the plant roots ideal for promoting a lush and healthy growth. It also increases oxygenation at the bottom of the aquarium and does not cloud the water.

NUTRONCARBO

Source of liquid organic carbon for planted freshwater aquariums. Thanks to its composition, NUTRONCARBO provides essential carbon for plant growth. It can be used as an alternative to bottled CO2 or in addition to it. It is an essential product for correct photosynthesis. We recommend to use with NUTRONFERRO and NUTRONFLORA to get the best luxuriant aquatic plants.

Marine Salt of first quality

We are pioneer in sea salt production since 1983

SEA SALT is produced at our facility and has a level of purity near to 100%.

Each grams of sea salt contains the same mix of trace elements found in sea water which are essential for the survival of marine organisms.

OCEAN SALT

Is very quick dissolving marine salt for ornamental aquariums with a grade of purity of almost 100%. The salt contains all the necessary trace elements for ensuring a correct fish and invertebrates growth. These trace elements remain unaltered when the salts dissolve.

OC30KG		30 Kg	1 pcs	8 018189 500145

OCEAN REEF

Is are quick dissolving marine salt specific for reef aquariums with a grade of purity just under 100%. This salt contains all the necessary trace elements for ensuring a correct fish and invertebrates growth and are further fortified with calcium and vitamins for stimulating growth and strengthening invertebrates with rigid skeleton.

OCEAN LOBSTER

A marine salt which is perfect for breeding and stocking crayfish, lobster and any kind of crustacean for human feeding in restaurant and in fishmonger's shop. OCEAN LOBSTER salt has 8.1 pH value, it is totally fast soluble and keeps water crystal clear.

It contains all the necessary trace elements for keeping crustaceans not only alive but also very safe because it re-creates the biological balance of the sea water in tank.

AR20KG	20 Kg	1 pcs	8 018189 500176

Trace Elements Essential for life

Trace elements stimulate the healthy and balanced growth of all aquarium animals. They stabilize biological system.

MARINE TRACE ELEMENTS

Concentrated solution of trace elements, containing potassium, iodine, fluorine, manganese, molybdenum, boron, zinc, nickel, lithium and iron.

MARINE TRACE ELEMENTS guarantees an optimal development, growth and coloration (pink, red, green / yellow, purple / blue) of LPS, SPS and soft corals. Iodine in soft corals helps protect the mucus and promotes the development of the pink colour, it is also essential for the correct metabolism of fish, corals and crustaceans; iron promotes green / yellow colour; boron promotes red, pink and purple colouring; manganese favours blue and red colour.

Item code	Size	Carton	Barcode
RTR	250 ml	6 pcs	8 018189 800436

MARINE KH PLUS

Concentrated solution for increasing carbonate hardness in marine reef aquariums, essential for the growth of LPS and SPS corals. The carbonate hardness stabilizes the pH value in aquariums and helps the correct absorption of calcium and magnesium. The ideal value of KH is between 8-10 °dKH.

Item code	Size	Carton	Barcode
RKH	250 ml	6 pcs	8 018189 800443

REEF CALCIUM

Concentrated solution of pure calcium for reef aquariums and for all marine aquariums with invertebrates, especially studied to compensate sudden drops and calcium deficiencies. Calcium is one of the basic element for the formation of the endoskeletons of hard corals such as LPS and SPS.

The addition of REEF CALCIUM helps to maintain the optimal calcium value between 400-500 mg / l. The skeleton of corals, algae, molluscs and many invertebrates is largely made up of calcium and magnesium carbonates. In aquariums with many corals and invertebrates, the calcium level can easily change, which is why REEF CALCIUM allows you to maintain adequate levels of calcium in the aquarium. REEF CALCIUM provides a rich source of metabolic energy to help coral growth at times of greatest demand during growth, furthermore the formulation is designed to be perfectly absorbable by corals.

Item code	Size	Carton	Barcode
RCA	250 ml	6 pcs	8 018189 800450

REEF MAGNESIUM

Concentrated solution of pure magnesium for reef aquariums and for all marine aquariums with invertebrates.

Magnesium is one of the basic element for the formation of hard coral skeletons such as LPS and SPS.

The addition of REEF MAGNESIUM helps to maintain the optimal magnesium value between 1100-1350 mg / l.

A low concentration of magnesium makes difficult the absorption of the calcium in corals.

Therefore, it is recommended to check the magnesium value before administering calcium.

Item code	Size	Carton	Barcode
RMA	250 ml	6 pcs	8 018189 800467

REEF POTASSIUM

Concentrated pure potassium solution for reef aquariums and for all marine aquariums with invertebrates.

Potassium is important for the neurological functions of corals and actively participates to carry the nutrients to soft corals. In corals SPS, it stimulates colouring. A low potassium concentration causes coral discoloration and polyps retraction. The ideal potassium value is between 370 - 420 mg / L.

Invertebrates need potassium for growth and coloration, therefore this value should be kept under control and increased when necessary with REEF POTASSIUM.

Item code	Size	Carton	Barcode
RPO	250 ml	6 pcs	8 018189 800474

REEF STRONTIUM

Concentrated solution of pure strontium for the reef aquarium and for all marine aquariums with invertebrates.

Strontium is used by hard corals for the formation of their skeleton, it promotes the synthesis of the calcareous substance helping the assimilation of calcium and favouring coloration.

The ideal strontium value is between 8 - 8.3 mg / L.

Invertebrates need strontium for growth, therefore it is advisable to keep this value controlled and increase it when necessary with REEF STRONTIUM.

MAGICTHERM 25 - 50 - 100 - 150 - 200 -300

Heater ideal for both fresh and saltwater aquariums. The heater consists of a borosilicate glass tube which provides exceptional resistance to sudden temperature changes and to heat, guaranteeing against the risk of breakage or explosion in the event the heater still on is removed from the aquarium accidentally and then returned to the water. MAGICTHERM has a double sealing making it completely watertight and shatterproof.

The heating element, manufactured using only high-quality materials and combined with this specific high-thermal conductive glass structure, ensures fast and efficient heating.

The visible graduated scale for temperature control located on the cap of the heater allows for easy temperature adjustment offering also an optimal temperature range between 20 °C and 34 °C making this the ideal heater for all types of aquariums and fish.

ZEOLITH POND

Various minerals exist in Nature called zeolites. After extensive laboratory research, PRODAC have chosen ZEOLITH because of its high absorption power and its porosity, which gave the best results in helping the efficacious establishment of bacteria of the Nitrosomonas group.

Item code	Size	Weight	Carton	Barcode
PZE05	6 lt	5 Kg	1 pcs	8 018189 130298

AQUASANA POND

Is an indispensable water conditioner which not only eliminates chlorine and chloramines in tap water, but also reduces the polluting effects caused by heavy metals in the water, conditioning and preparing the pond water for pond life and fish. It contains ALOE VERA a special and natural colloid which protects the skin slime and gills of fish reducing stress when changing water maintaining the pH level stable.

Item code	Size	Carton	Barcode
PASAN500	500 ml	6 pcs	8 018189 130236

ALGACONTROL POND

Is a water treatment which controls, prevents and eliminates the growth, stimulated by sunlight, of floating algae in ponds. In fact floating algae is harmful to fish and aquatic plants. ALGACONTROL POND makes pond water crystal clear and maintains the pond in perfect conditions ensuring the safe growth and reproduction of fish and plants.

MFP	6000 lt	40	9 W	2400	2,5	2 pcs	8 018189 166495

COMPLETELY SUBMERSIBLE FILTER.

- Limited dimension, friendly use .
- High stability due to its compact shape.
- Easy positioning.
- High efficiency, low maintenance.

FILTER SYSTEM:

- Mechanical filter: traps coarse impurities: leaves, excess of food.
- Biological filter: highly porous material offers a large surface area to help and promote bacteria development which then break down the organic substances.
- UV Light: eliminates algae.
